

handbook of asynchronous machines pdf

An induction motor or asynchronous motor is an AC electric motor in which the electric current in the rotor needed to produce torque is obtained by electromagnetic induction from the magnetic field of the stator winding. An induction motor can therefore be made without electrical connections to the rotor. An induction motor's rotor can be either wound type or squirrel-cage type.

The Embedded Design Handbook complements the primary documentation for the Intel tools for embedded system development. It describes how to most effectively use the tools, and recommends design styles and practices for developing, debugging, and optimizing embedded systems using Intel-provided tools. The handbook introduces concepts to new users of Intel's embedded solutions, and helps to ...

This document describes design techniques to achieve maximum performance with the Intel® Hyperflex™, a FPGA architecture. This architecture supports new Hyper-Retiming, Hyper-Pipelining, and Hyper-Optimization design techniques that enable the highest clock frequencies for Intel® Stratix® 10 devices.

A teleprinter (teletypewriter, Teletype or TTY) is an electromechanical typewriter that can be used to send and receive typed messages through various communications channels, in both point-to-point and point-to-multipoint configurations. The machines were adapted to provide a user interface to early mainframe computers and minicomputers, sending typed data to the computer and printing the ...
