THE MATHS TEACHER'S HANDBOOK - arvindguptatoys.com

The history of mathematics can be seen as an ever-increasing series of abstractions. The first abstraction, which is shared by many animals, was probably that of numbers: the realization that a collection of two apples and a collection of two oranges (for example) have something in common, namely quantity of their members. As evidenced by tallies found on bone, in addition to recognizing how to ...

This is more than just finding words on a grid. The words are not given, they have to get them from the diagrams. There is a moderate and a 'difficult' version so the activity is accessible to all and there are many opportunities for extension. The PowerPoint reveals the solutions one word at a time so you can stop and discuss each shape as you go.
