The High Energy Liquid Laser Area Defense System (HELLADS), is a Counter-RAM system under development that will use a powerful (150 kW) laser to shoot down rockets, missiles, artillery shells and mortars. The initial system will be demonstrated from a static ground-based installation, but in order to eventually be integrated on an aircraft, design requirements are maximum weight of 750 kg ...

High Energy Liquid Laser Area Defense System - Wikipedia

A laser is a device that emits light through a process of optical amplification based on the stimulated emission of electromagnetic radiation. The term "laser" originated as an acronym for "light amplification by stimulated emission of radiation". The first laser was built in 1960 by Theodore H. Maiman at Hughes Research Laboratories, based on theoretical work by Charles Hard Townes and Arthur ...
