Isochrony is the postulated rhythmic division of time into equal portions by a language. Rhythm is an aspect of prosody, others being intonation, stress and tempo of speech.. Three alternative ways in which a language can divide time are postulated: The duration of every syllable is equal (syllable-timed);

The downbeat is the first beat of the bar, i.e. number 1. The upbeat is the last beat in the previous bar which immediately precedes, and hence anticipates, the downbeat. Both terms correspond to the direction taken by the hand of a conductor.. This idea of directionality of beats is significant when you translate its effect on music. The crisis of a measure or a phrase is a beginning; it ...
