A clock face, or dial, is the part of an analog clock (or watch) that displays the time through the use of a fixed-numbered dial or dials and moving hands. In its most basic form, recognized throughout the world, the periphery of the dial is numbered 1 through 12 indicating the hours in a 12-hour cycle, and a short hour hand makes two revolutions in a day.

There wouldn't be much of a need for continuous counting, since we could rest assured that the national debt we are immorally laying on the backs of future generations will once again more than double over the next 8 years to 40 trillion dollars, if the same elite group of Masters continue to rule over and oppress their hapless victims that live on American plantations.

World population. The current world population of 7.2 billion is projected to increase by 1 billion over the next 12 years and reach 9.6 billion by 2050, according to a United Nations report launched today, which points out that growth will be mainly in developing countries, with more than half in Africa.
