30.11.2015. A new model of BroadSweeper BS-930-1-HP with extended wavelength-tuning range.. Superlum is pleased to introduce a new model of a high-power wavelength-swept laser, the BroadSweeper BS-930-1-HP with an extended wavelength-tuning range. The laser is built on the use of a quantum-confined SOA and a quasi-collinear AOTF in an external fiber ring cavity.

A study on the failure behavior and mechanical properties of unidirectional fiber reinforced thermosetting and thermoplastic composites

A study on the failure behavior and mechanical properties

In optics, the refractive index or index of refraction of a material is a dimensionless number that describes how fast light propagates through the material. It is defined as $n = \frac{c}{v}$, where c is the speed of light in vacuum and v is the phase velocity of light in the medium. For example, the refractive index of water is 1.333, meaning that light travels 1.333 times as fast in vacuum as in water.

Refractive index - Wikipedia

A supercapacitor (SC) (also called a supercap, ultracapacitor or Goldcap) is a high-capacity capacitor with capacitance values much higher than other capacitors (but lower voltage limits) that bridge the gap between electrolytic capacitors and rechargeable batteries. They typically store 10 to 100 times more energy per unit volume or mass than electrolytic capacitors, can accept and deliver ...

Supercapacitor - Wikipedia

A hierarchical core double-shell Ti-doped LiMnPO₄@NaTi₂(PO₄)₃@C/3D-G architecture is smartly constructed via in situ synthetic methodology, and exhibits outstanding rate capability and superior cyclic stability for advanced lithium-ion batteries as a competitive cathode, benefiting from synergetic contributions from the integrated design rationales.

Advanced Energy Materials: Early View

Free-space laser communication systems have the potential to provide flexible, high-speed connectivity suitable for long-haul intersatellite and deep-space links. For these applications,...

The importance of harvesting mechanical energy as electrical energy motivates the search for new technologies. Electromagnetic electric energy generators suffer from low power densities and high cost per watt when scaled to the millimeter and smaller dimensions needed for emerging applications (). Piezoelectric and ferroelectric harvesters work well for high-frequency, low-strain deformations ...

Currently, PCE offers sensors for inprocess moisture measurement with an accuracy of up to 0.2 %. New instruments which are currently under development will achieve accuracy values that are significantly lower than previously attainable results.
