Recent weather events such as deadly heat waves and devastating floods have sparked popular interest in
understanding the role of global warming in driving extreme weather.

Climate Communication | Overview

Some meteorological processes are too small-scale or too complex to be explicitly included in numerical
weather prediction models. Parameterization is a procedure for representing these processes by relating
them to variables on the scales that the model resolves. For example, the gridboxes in weather and climate
models have sides that are between 5 kilometers (3 mi) and 300 kilometers (200 mi ...

The climate of the planet Mars has been a topic of scientific curiosity for centuries, in part because it is the
only terrestrial planet whose surface can be directly observed in detail from the Earth with help from a
telescope.. Although Mars is smaller than the Earth, at 11% of Earth's mass, and 50% farther from the Sun
than the Earth, its climate has important similarities, such as the ...
