It's impossible. Even if software were to restrict the number of times a user could press the Print button on a menu, it's not permitted for that software to control the operating system tasks (such as the printer driver), so the user can change the "number of copies" in the driver to whatever they want, or print to file and send that file to any number of other users.

In probability theory, one says that an event happens almost surely (sometimes abbreviated as a.s.) if it happens with probability one. In other words, the set of possible exceptions may be non-empty, but it has probability zero. The concept is precisely the same as the concept of "almost everywhere" in measure theory. In probability experiments on a finite sample space, there is often no ...
