1. Adversity. In 2013, the United States reached an educational milestone. For the first time, a majority of the country's public school students " 51 percent of them, to be precise " fell below the federal government's threshold for being "low income," meaning they were eligible for a free or subsidized school lunch.

In Galileo's time-- science began using man's most reliable truth detector---- "Repeatable published physical measurements of the thing under study coupled with vigorous technical debate using a common language called mathematics". It works! A popular example of it working is forensic medicine in law enforcement. Compare today with technology with 50 years ago.
